# TELGUARD
INTERACTIVE

As more of your customers get rid of their landlines they are turning to mobile apps to make their lives easier. With Telguard Interactive you can give them peace of mind in the palm of their hand for a fraction of the price of other solutions.

Available for the iPhone, Android and BlackBerry, Telguard Interactive is ready for activation with Telguard's cellular alarm communicators, making it compatible with virtually all residential alarm panels. This means that Telguard Interactive gives you an opportunity to easily increase your RMR not only from new installations, but also from your existing customer base, regardless of their currently installed security system.

Every Panel, Every Time

Telguard Interactive, unlike other solutions, works with your customers' existing panels because it is a built-in feature of Telguard devices. Now interactivity is available for retrofits using Contact ID without the expense of replacing legacy alarm panels.

Installation Couldn't Be Easier

We leverage the basic features of most security panels: the key-switch zone, output triggers and opening and closing reports. The key-switch zone feature allows for quick arming & disarming at the turn of a key. This ability is built into Telguard devices. With Telguard Interactive homeowners can turn the key with a touch of a button. By programming the panel for opening & closing reports, Telguard Interactive becomes aware of all arming activity.

Customized Dealer Information

We know how important marketing is for your business. Telguard Interactive gives you specific branding areas on the mobile app and the online portal making it clear to your customers that you are providing them with this advanced solution.

More About Telguard Interactive

In addition to giving your customers remote arming control of their system from a mobile device, Telguard Interactive lets them receive mobile notifications of any alarm status change, view arming and alerting history and securely share access to their system. Telguard Interactive makes total remote connectivity affordable and simple to use for all of your customers.

Stylized Mobile App Design

Today's best mobile apps are designed for people on the go, providing just the right amount of information and functionality. Created by a world renowned design firm, Telguard Interactive's mobile app matches the sophistication and style users expect to see on their iPhone, Android or BlackBerry.

Consumer-Friendly Online Portal

MyTelguard.com online portal lets your customers quickly and easily enter account information, contacts, authorized users, and control their system seamless from anywhere on all web browsers.
